ABSTRACT

Financial statistics for fiscal year 1970 are reported for 91 public radio stations which meet the requirements for CPB (Corporation for Public Broadcasting) general support grants. The statistics are for the aggregate United States, classified by geographic regions and types of licensees. Total income for radio operations for the fiscal year ending June 30, 1970 for the radio stations in the aggregate United States reached almost $9.4 million. The direct operating costs and capital expenditures for radio operations were $8.6 and $1.1 million, respectively. CPB-qualified public radio stations varied widely in their income, operating costs, and capital expenditures. The median amount spent for direct operating costs for radio operations was $74,838. The median amount spent for capital expenditures for radio operations was $2,900. The median income for radio operations was $81,441. The complete statistics are given in tabular form, and are summarized in an expository presentation. (JY)

SOURCE AND DISTRIBUTION OF FUNDS

Source and distribution of funds for 91 CPB-qualified public radio stations: Aggregate United States, fiscal year 1970

Source of funds		Distribution of funds	
Total funds	$10,085,526	Total funds distributed	$10,085,526
Total income	9,900,535	Direct operating costs	8,581,048
By operation:			
Radio	9,377,433	Capital expenditures	1,065,113
Television(dual licensees)	523,102	Invested or carried over into fiscal year 1971	421,786
Withdrawn from investments and prior years' appropriations	126,236	Repayment of loans	17,579
Received from loans	58,755		

HIGHLIGHTS

Total income for radio operations for the fiscal year ending June 30, 1970, for 91 CPB-qualified public radio stations in the aggregate United States reached almost $9.4 million. The direct operating costs and capital expenditures for radio operations were $8.6 and $1.1 million, respectively.

As indicated below, CPB-qualified public radio stations varied widely on each of the three summary financial statistics. In each instance, CPB-qualified public radio stations licensed to the 10 community organizations reported the largest median income ($98,000), operating costs ($115,000), and capital expenditures ($7,000) for radio operations. However, the highest income ($426,000), operating costs ($418,000), and capital expenditures ($146,000) for radio operations were reported by a CPB-qualified public radio station licensed to an institution of higher education.

	All CPB-qualified public radio stations	Median	Range High	Range Low	Source
Income for radio operations	$9,377,433	$81,441	$426,342	$5,601	Table B
Direct operating costs for radio operations	8,581,048	74,838	418,342	1,950	Table G
Capital expenditures for radio operations	1,065,113	2,900	145,685	0	Table K

FOREWORD

This publication is part of a planned series of statistical reports on public broadcasting, based on information provided by public television and radio station licensees to the Corporation for Public Broadcasting (CPB). The U. S. Office of Education's National Center for Educational Statistics (NCES) has supported the data-collection program and is responsible for guiding the analysis of data and preparing the reports in the series. John Golden, Director for Planning, Research, and Evaluation, CPB, and Boyd Ladd, Assistant Director for Statistical Development, NCES, direct the efforts of the two agencies in this enterprise.

This publication presents financial data for fiscal year 1970 for 91 CPB-qualified public radio stations (i.e., public radio stations meeting the requirements for CPB general support grants) of the aggregate United States, classified by geographic region and types of licensees. The primary participants in preparation of this report were George W. Stein, of CPB, who planned the initial data collection, designed the computer data files, and drafted the appendixes; Ronald J. Pedone, of NCES, who designed and drafted the analysis; and Robert E.L. Tolbert, of CPB, who assisted in the design of the computer data files and prepared the computer tabulations.

This publication is possible only because of the cooperation and assistance of the various public radio stations. We are, therefore, extremely grateful to the many station managers and executive directors who took time from their very busy days to complete the questionnaires.

John W. Macy, Jr.

L. Amount and percent of total capital expenditures by CPB-qualified public radio stations for radio operations, by type of licensee and type of capital expenditures: Aggregate United States, fiscal year 1970 20

M. Amount and percent of total capital expenditures by CPB-qualified public radio stations for radio operations, by geographic region and type of capital expenditures: Aggregate United States, fiscal year 1970 21

N. Total, median, mean, and range of CPB-qualified public radio stations' aggregate cumulative capital expenditures for radio operations, by geographic region and type of licensee: Aggregate United States, through fiscal year 1970 22

Detail Tables

1. Total, median, mean, and range of CPB-qualified public radio stations' income from Federal Government agencies for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 24

2. Total, median, mean, and range of CPB-qualified public radio stations' income from public broadcasting agencies for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 25

3. Total, median, mean, and range of CPB-qualified public radio stations' income from State colleges and universities for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 26

4. Total, median, mean, and range of CPB-qualified public radio stations' income from other colleges and universities for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 27

5. Total, median, mean, and range of CPB-qualified public radio stations' income from local boards of education for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 28

Page

6. Total, median, mean, and range of CPB-qualified public radio stations' income from State boards of education for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 29

7. Total, median, mean, and range of CPB-qualified public radio stations' income from other State government sources for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 30

8. Total, median, mean, and range of CPB-qualified public radio stations' income from other local government sources for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 31

9. Total, median, mean, and range of CPB-qualified public radio stations' income from subscribers and individuals for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 32

10. Total, median, mean, and range of CPB-qualified public radio stations' income from national foundations for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 33

11. Total, median, mean, and range of CPB-qualified public radio stations' income from other foundations for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 34

12. Total, median, mean, and range of CPB-qualified public radio stations' income from underwriting of specific programs for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 35

13. Total, median, mean, and range of CPB-qualified public radio stations' income from other production contracts for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 36

Page

14. Total, median, mean, and range of CPB-qualified public radio stations' gross auction income for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 37

15. Total, median, mean, and range of CPB-qualified public radio stations' income from subsidiary enterprises for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 38

16. Total, median, mean, and range of CPB-qualified public radio stations' income from other business and organizations for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 39

17. Total, median, mean, and range of CPB-qualified public radio stations' income from contributions by commercial stations for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 40

18. Total, median, mean, and range of CPB-qualified public radio stations' income from all other sources for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 41

19. Total, median, mean, and range of CPB-qualified public radio stations' direct operating costs of technical salaries and wages for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 42

20. Total, median, mean, and range of CPB-qualified public radio stations' direct operating costs of technical expenses for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 43

21. Total, median, mean, and range of CPB-qualified public radio stations' direct operating costs of programming salaries and wages for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 44

45. Total, median, mean, and range of CPB-qualified public radio stations' capital expenditures for vehicles for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 68

46. Total, median, mean, and range of CPB-qualified public radio stations' capital expenditures for other technical equipment for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 69

47. Total, median, mean, and range of CPB-qualified public radio stations' capital expenditures for remote equipment for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 70

48. Total, median, mean, and range of CPB-qualified public radio stations' capital expenditures for all other equipment for radio operations, by geographic region and type of licensee: Aggregate United States, fiscal year 1970 71

INTRODUCTION

In fiscal year 1970, the Federal Communications Commission (FCC) reported that the total number of operating educational/public radio stations was 456 [1/]. As of June 30, 1970, 91 of the 456 stations were designated by the Corporation for Public Broadcasting (CPB) as eligible for CPB general-support grants [2/].

This report presents statistics on the finances of 91 CPB-qualified public radio stations (i.e., public radio stations qualified to receive general support grants from the Corporation for Public Broadcasting after meeting the minimum requirements concerning effective radiated power, hours on the air, staff and facilities, etc.) during the fiscal year ending June 30, 1970. These stations (call-lettered transmitters; e.g., WGBH-FM) broadcasted in the United States and Puerto Rico.

The data contained in this report were collected between December 1970 and April 1971 by the Corporation for Public Broadcasting, a nonprofit corporation established by the Public Broadcasting Act of 1967. The data were gathered in most cases from the stations' general managers or executive directors. The data are grouped by types of licensee of the stations and their locations, i.e., geographic region.

a. Types of licensees

i. Institutions of higher education--universities and colleges.

ii. Local public school systems--public school systems below the State level; i.e., local and county public school systems and school districts.

iii. State authority, State education agency, municipal authority, and other licensed agencies--State boards of education or State authorities and commissions set up by act or legislation specifically for operating noncommercial stations and networks. Also included are two public radio stations licensed to the city of New York and one nondomestic station licensed to the department of education in Puerto Rico.

iv. Community organizations--independently created corporations and foundations independent of State and local governments.

1/ Federal Communications Commission, "36th Annual Report/Fiscal Year 1970", p.47.

2/ See Appendix A., Criteria for Determining CPB Assistance Eligibility.

b. Geographic regions (aggregate United States including outlying areas):

i. United States:

North Atlantic	Great Lakes and Plains	Southeast	West and Southwest
Connecticut *	Illinois	Alabama *	Alaska
Delaware *	Indiana	Arkansas	Arizona
District of Columbia	Iowa	Florida	California
Maine	Kansas	Georgia	Colorado
Maryland	Michigan	Kentucky	Hawaii *
Massachusetts	Minnesota	Louisiana *	Idaho *
New Hampshire *	Missouri	Mississippi **	Montana *
New Jersey	Nebraska	North Carolina	Nevada
New York	North Dakota	South Carolina *	New Mexico
Pennsylvania	Ohio	Tennessee	Oklahoma *
Rhode Island *	South Dakota	Virginia	Oregon
Vermont *	Wisconsin	West Virginia	Texas
			Utah
			Washington
			Wyoming *

ii. Outlying areas

American Samoa *
Canal Zone *
Guam *
Puerto Rico
Trust Territority of Pacific Islands *
Virgin Islands of U. S. *

This publication is prepared as a companion volume to Financial Statistics of Noncommercial Television License Holders: Fiscal Year 1970, DHEW Publication No. (OE) 72-67.

The detailed tables 1 through 18 are arranged in the same order as the categories shown in the left-hand columns of summary tables C and D; tables 19 through 36, as in H, I, and J; and tables 37 through 49, as in L and M.

Means and Medians for an item were computed on the basis of all 91 radio stations rather than just for stations reporting a value greater than zero for that item. Where the median is zero for an item, half of all stations reported zero for that item.

---

* No CPB-qualified public radio station as of June 30, 1970.

** Public radio station located in State and broadcasting as of June 30, 1970, but ineligible as CPB-qualified because station did not file financial report for fiscal year 1970.

CPB-QUALIFIED PUBLIC RADIO STATIONS

Today, public radio is largely a college and university phenomenon. As of June 30, 1970, there were 91 CPB-qualified public radio stations, of which 67 (74 percent) were licensed to institutions of higher education (table A). Four stations were licensed to local public school systems, and 10 each were licensed to State/municipal authorities and to community organizations. More stations (40) were located in the Great Lakes and Plains region of the United States than in any other region. The West and Southwest region was the only one in which all types of licensee categories were found.

INCOME FOR PUBLIC RADIO STATION OPERATIONS

For the entire 1970 fiscal year, the total income for radio operations of the 91 CPB-qualified public radio stations amounted to $9.4 million (table B). Seventy-two percent ($6.7 million) of the total was reported by the 67 stations licensed to institutions of higher education. The 10 stations licensed to State/municipal authorities reported incomes totaling $1.1 million (12 percent) and the 10 licensed tc community organizations reported $1.3 million (14 percent). The four CPB-qualified public radio stations licensed to local public school systems reported $220,000.

Among the five regional groupings, the largest total income, $4.5 million, was reported by the 40 stations in the Great Lakes and Plains region, with 44 percent of the total number of stations. Half of all CPB-qualified public radio stations reported income for operations of $81,000 or more. The lowest amount, $5,600 was reported by a station licensed to a State/municipal authority and located in the Southeast region; the highest, $426,000 (about 75 times higher), by a station licensed to an institution of higher education and located in the Great Lakes and Plains region.

Sources of Income

During fiscal year 1970, institutions of higher education provided more than half ($5.3 million) of all money received by the 91 CPB-qualified public radio stations for radio operations (table C). Of the remaining sources, only State and local governments (excluding educational components) provided a total of more than $1.0 million.

The various sources distributed the money they provided to stations in substantially different patterns. For example, stations licensed to institutions of higher education received 70 percent ($223,000) of the money provided by the Federal Government, 74 percent ($376,000) of that provided by public broadcasting agencies, and almost all ($5.2 million) of that provided by institutions of higher education. From State boards of education, stations licensed to institutions of higher education and

to State/municipal authorities received nearly equal amounts -- $184,000 and $186,000 respectively. In turn, stations licensed to State/municipal authorities received two-thirds ($801,000) of the funds provided by "other" State and local governments sources (excluding educational components). Stations licensed to community organizations received 89 percent ($799,000) of the funds provided by subscribers and individuals, 62 percent ($234,000) of those by foundations, and 62 percent ($234,000) by all other sources combined. (See table C.)

The reliance of CPB-qualified public radio stations on a specific source for income (i.e., more than 50 percent of income received from one source) varied by type of station licensee (table C). More than three-fourths ($5.2 million) of the total income reported by the 67 stations licensed to institutions of higher education was received from institutions of higher education. Stations licensed to local public school systems received $156,000 (71 percent of their total income) from local public school systems. Nearly three-fourths ($801,000) of total income reported by State/municipal authority-licensed stations came from other local government sources (table 8). Three-fifths ($799,000) of total income reported by community organization-licensed stations was received from subscribers and individuals.

The 40 stations located in the Great Lakes and Plains region of the United States received $4.5 million, or nearly half of all money provided to CPB-qualified public radio stations in the United States from all sources (table D). About half, or more, of the funds provided by the Federal Government, State boards of education, subscribers and individuals, and foundations went to the 24 radio stations located in the West and Southwest region. Forty-nine percent ($250,000) of the money provided by public broadcasting agencies and 65 percent ($3.5 million) of the money provided by institutions of higher education went to stations located in the Great Lakes and Plains region. Sixty-two percent ($725,000) of the money provided by State and local government sources (primarily from local government sources and excluding educational components) went to radio stations located in the North Atlantic region. No single type of income source provided more than 15 percent of its total funds to stations located in the Southeast region.

CPB-qualified public radio stations located in the Great Lakes and Plains and the Southeast regions received, respectively, 77 percent ($3.5 million) and 71 percent ($0.6 million) of their total income for radio operations from only one type of income source--institutions of higher education. The sources of income for stations located in the North Atlantic and the West and Southwest regions were generally diverse--no one source providing more than 47 percent of the total income received by stations located in either of these regions. All of the total income ($8,000) received by the one station located in an outlying area came from public broadcasting agencies.

Income Attributed to Instructional Services

Of the $9.4 million received by CPB-qualified public radio stations for radio operations, an estimated $182,000, or 2 percent, was reported to be for providing instructional and classroom programming services (table E). Radio stations licensed to institutions of higher education reported the largest amount, $132,000 (or 73 percent of the entire amount of income attributed to instructional services), but it represented only 2 percent of their total income for radio operations. Interestingly, at least 22 stations licensed to all category types and located in all regional groupings reported that no income received was attributed to instructional services. Public radio stations located in the Great Lakes and Plains region attributed $124,000 to instructional services--3 percent of their total income received from all sources.

Indirect Operating Costs Absorbed by Other Institutions

CPB-qualified public radio stations reported $1.8 million for radio operations as costs not directly budgeted in a station's operating costs in fiscal year 1970 (table F). (For instance, employee fringe benefits, custodial and janitorial services, office materials and supplies, etc. for a station licensed to a local public school system might not be reported in the station's operating costs but would be part of the operating budget of the local public school system.)

Of the $1.8 million, $1.6 million (90 percent) was reported by stations licensed to institutions of higher education. Stations located in the Great Lakes and Plains region--comprising more than two-fifths of all stations--reported estimates amounting to nearly $1.0 million absorbed by other institutions (55 percent of the aggregate for the United States). Nearly all of the $1.0 million (99 percent) was reported by stations licensed to institutions of higher education. At least 15 stations, located among the five regional groupings and licensed to each of the licensee categories except local public school systems, reported that no costs incurred for radio operations were absorbed by other institutions.

DIRECT OPERATING COSTS FOR PUBLIC RADIO STATION OPERATIONS

The direct operating costs for radio operations reported by all CPB-qualified public radio stations for fiscal year 1970 amounted to $8.6 million (table G)--equivalent to 85 percent of all funds available and 92 percent of all income for radio operations. Stations licensed to institutions of higher education reported direct operating costs of $5.9 million--68 percent of the total. These costs for stations licensed to State/municipal authorities and community organizations were nearly identical--$1.249 million and $1.250 million, respectively. Almost half ($4.1 million) of the total were reported by the 40 stations (36 licensed to institutions of higher education) located in the Great Lakes and Plains region.

The operating costs, like income, varied widely among stations. Both the highest and lowest were reported by stations licensed to institutions of higher education, with the highest ($418,000) 214 times greater than the lowest ($1,950).

Type and Purpose of Direct Operating Costs

Of the $8.6 million total, about $6.5 million (76 percent) was spent on salaries and wages and $2.1 million (24 percent) on other expenses (table H). Radio stations licensed to State/municipal authorities spent proportionately more than any other station licensee category on salaries and wages (90 percent). Stations licensed to community organizations spent proportionately less than any other category on salaries and wages (57 percent). Stations located in the North Atlantic and the Great Lakes and Plains regions and the outlying areas of the United States spent nearly identical proportions on salaries and wages (79, 78, and 78 percent); and those proportions were higher than in the Southeast region (69 percent) and West and Southwest region (69 percent) (table I).

Radio stations spent most of their money (69 percent) for technical, programming, and general and administrative activities and functions (table J). Very little--less than 10 percent of all operating costs--was spent on instructional, developmental, promotional, and training activities.

CAPITAL EXPENDITURES FOR RADIO OPERATIONS

Capital expenditures for all CPB-qualified public radio stations during the fiscal year ending June 30, 1970, amounted to about $1.1 million (table K), or about 11 percent of the total funds distributed. Of the $1.1 million, slightly more than $7 of every $10 was expended by stations licensed to institutions of higher education. The capital expenditures by the 10 stations licensed to community organizations ($290,000) were 42 times those of the 10 stations licensed to State/municipal authorities ($6,900).

While total income and direct operating costs for radio operations were highest in the Great Lakes and Plains region, the 24 stations located in the West and Southwest region of the United States reported the highest capital expenditures--$418,000 (39 percent). Capital expenditures during fiscal year 1970, like income and direct operating costs, varied widely. Half of all stations reported capital expenditures of less than $2,900. The highest--one station located in the West and Southwest region and licensed to an institution of higher education--reported capital expenditures of $146,000. At least 10 stations reported no capital expenditures. These included at least one station in each geographic region and at least one among each type of licensee.

Types of Capital Expenditures

Nationally, radio stations spent more money on transmitters ($248,000) and on buildings ($150,000) than on any of the other specific types of

equipment and facilities (table L). For stations licensed to institutions of higher education, the largest categories of capital expenditures reported for radio operations were for transmitters ($172,000, or 23 percent of their total capital expenditures) and control room equipment ($136,000, or 18 percent of their total). Stations licensed to community organizations expended about $75,000 (26 percent) on transmitters and about the same--$78,000 (27 percent)--for each on buildings and on testing equipment.

By region, however, the two largest categories of capital expenditures varied somewhat (table M). In the North Atlantic region, testing equipment ($78,000) and transmitters ($77,000) were reported as the two largest expenditures; in the Great Lakes and Plains region, studio equipment ($83,000) and transmitters ($53,000); in the Southeast region, control room equipment ($37,000) and transmitters ($32,000); and in the West and Southwest region, buildings ($99,000) and transmitters ($85,000) as their two largest capital expenditures.

No capital expenditures for land and land improvements were reported by CPB-qualified public radio stations during fiscal year 1970.

CUMULATIVE CAPITAL EXPENDITURES FOR RADIO OPERATIONS

The 91 CPB-qualified public radio stations that reported $1.1 million in capital expenditures for radio operations during fiscal year 1970 also reported $11.7 million as their cumulative expenditures up to and including that year (table N). Of the $11.7 million, $8.4 million (71 percent) was reported by the 67 stations licensed to institutions of higher education. The highest amount of cumulative capital expenditures, $771,000, was reported by a station in the Southeast region, licensed to a State/municipal authority. Half of all stations reported cumulative capital expenditures of at least $96,000. The data show wide differences between the fiscal year 1970 expenditures and the cumulative expenditures through that year. For example, during fiscal year 1970, the capital expenditures for community organization-licensed stations were 42 times greater than those for State/municipal authority-licensed stations; but, in the cumulative expenditures, the 21 former was about half the latter. During fiscal year 1970, stations located in the West and Southwest region expended more than those in any other regional grouping. Cumulative expenditures, however, were highest for stations located in the Great Lakes and Plains region. In fact, they accounted for 45 percent ($5.2 million) of the total cumulative expenditures and had expended through the years more than twice as much as was spent in any other geographic region.

APPENDIX A

CRITERIA FOR ASSISTING PUBLIC RADIO STATIONS *

Recognizing that the Corporation for Public Broadcasting is charged with determining how to best utilize limited financial resources for the systematic development of a significant, national Public Radio service, the following criteria shall be considered in determining the appropriateness of Corporation support to FCC authorized noncommercial educational radio stations:

1. The station should operate with an effective radiated power of no less than 250 watts on a standard FM (main channel) frequency or a rated transmitter power of no less than 250 watts on an AM frequency.

2. An adequately-equipped control room and studio should be available for program production and origination.

3. A full-time, paid, professional staff of no less than three persons, or equivalent, should be employed.

4. A minimum operational schedule of 48 weeks per year, 6 days per week, 8 hours per day, should be maintained.

5, A minimum of approximately half of a station's broadcast schedule should be devoted to educational, informational, and cultural programs for a public audience as distinguished from instructional and separate from doctrinal or other specifically oriented material.

NOTE: Satellite stations, without sufficient local professional staff, technical, or programming capabilities and joint AM-FM operations engaged in simulcasting, may be included in any listing of qualifying Public Radio Stations provided other standards are met, but generally will not be eligible for independent support.

---

* Taken from CORPORATION FOR PUBLIC BROADCASTING,"Policy for Public Radio Station Assistance," September 1969.

APPENDIX B

HISTORY OF SURVEYS OF CPB-QUALIFIED PUBLIC RADIO STATIONS

Toward the close of fiscal year 1969, the Corporation for Public Broadcasting (CPB) recognized the need for credible statistics and information concerning its constituents' broadcasting operations in order to properly execute its legal mandate (i.e., amendment to Title III of the Communications Act of 1934). Accordingly, the Corporation issued a grant to the National Association of Educational Broadcasters (NAEB) in July 1969 to develop and implement a management information system. During the next several months, the following tasks were accomplished:

1. An examination was made of existing and previous surveys and questionnaires to determine the essential and critical data elements which had been collected on a traditional basis.

2. Interviews were conducted with key people within the industry, at CPB, NAEB, and the Federal Communications Commission, and with a representative sample of station personnel to determine additional needs for information which could be collected, ordered, and quantified.

3. These findings were incorporated into the design of a survey instrument and included elements of organization, personnel, finances, facilities, and broadcasting and programming statistics.

In February 1970, survey instruments were mailed to all known existing public (noncommercial) radio stations, approximately 450 in number, covering information for the fiscal year ending June 30, 1969. Ultimately, 200 of these stations filed completed (or partially completed) reports. At about this time, the Corporation for Public Broadcasting established certain minimal criteria for radio stations in order to qualify for CPB general support grants (see appendix A). Only 72 of the 450 stations satisfied these minimal criteria initially. Because of difficulties encountered--low response and inaccurate and incomplete returns--the Corporation decided to focus upon, develop, and establish a base of information only on public radio stations meeting the criteria for CPB general support grants.

In April 1970, design work began on developing computer files for the storage and processing of selected data collected in the fiscal year 1969 survey. The selection of data was based on (1) those of the highest interest and utility to CPB management and (2) those judged to be of sufficient reliability and validity.

During the period July-September 1970, the fiscal year 1969 survey instrument was redesigned, incorporating new findings, new needs of information, and reflecting changes as a result of survey experience. An attempt was made to clarify the questionnaire, to make it more understandable to respondents, and to facilitate data conversion to (redesigned) computer files. In December 1970, the revised instrument was sent to 96 public radio stations considered eligible for CPB general support grants and covering information for the fiscal year ending June 30, 1970. The fiscal year 1970 survey also served as the base year for information on CPB-qualified public radio stations. (This report, however, presents data for 91 stations because five stations either discontinued operations, failed to maintain the necessary minimal criteria for CPB general support grants during fiscal year ending June 30, 1970, or did not file a financial report for fiscal year 1970, required of all stations seeking CPB general support grants.)

APPENDIX C

METHODOLOGICAL DESCRIPTION OF SURVEYS CONDUCTED ON CPB-QUALIFIED PUBLIC RADIO STATIONS

I. Methodological Description--1970 Fiscal Year Survey

The fiscal year 1970 survey had several advantages over the one for fiscal year 1969 in addition to those previously mentioned:

1. Having once participated in the survey, CPB-qualified public radio stations were better prepared to comply with the new request.

2. The project in 1970 was resident at the Corporation for Public Broadcasting, and the implication regarding the value of such data for short- and long-range funding were understood by station management.

3. The Corporation made submission of the survey instrument a prerequisite to receiving future financial support.

The survey redesign incorporated the insights gained from the previous exercise of the 1969 survey and made every effort to clarify ambiguities and include fundamentals of good questionnaire design. A glossary ot terms was furnished, and every effort was made to achieve uniform interpretation and reporting. As a result of this document, many stations have expressed the fact that they have designed or redesigned their record-keeping activities in accordance with the survey instrument. A level of data-keeping uniformity has been achieved by CPB-qualified public radio stations.

Survey instruments were mailed to station managers or chief executives of 96 CPB-qualified public radio stations on December 10, 1970. Returns were rerouted to the Director of Management Systems Development at the Corporation.

A manual edit was performed on each survey instrument immediately upon receipt. Minor and obvious omissions and errors were corrected by a survey analyst. Auditing measures similar to those used for 1969 were performed, including footing, cross-footing, and balance checks for accuracy under the financial section. Designed into the financial section were a series of checks to assure that total income and total expenditures were accounted for. Logical and numerical errors were identified. These included such items as incorrect totals and cross-totals, missing data, illogical data (impossible broadcast schedules, for example), and any other items where perception and experience suggested investigation.

In each case, photocopies were taken of the pages in question; the individual items in question were circled in red and returned to the stations with an accompanying letter of explanation. Eventually, all respondents satisfactorily corrected the items in question.

Preparation of the data base was accomplished as a result of input file layouts designed to include essentialy all of the data from the questionnaire. (Narrative information, such as description of awards and discussion of public service activities, was not included. Some such items were coded, however, and permit at least a tabulation of data present or not present.) These input file layouts, which served as source documents for keypunching, were used to manually record and code data from the survey instruments. These converted data were keypunched by an outside service bureau for all but one of the five computer files established. The other file, the one for radio personnel and addresses, was entered manually at the computer terminal by CPB staff. Computer listings were run for the input data for each file and individually edited against the original source document by CPB staff. These cards were read into a temporary disk file from which machine editing was performed. These machine edits performed arithmetic functions and provided totals and controls within records, within licensee types, and in total. Certain control totals, where practical, were built into each record for this comparison. Records not surviving this edit or audit were flagged, and output by the computer noted the location and type of error. Such errors were corrected, reentered, and passed again through the machine editing function until all individual records were corrected. Programs were then run to produce subtotals by "controls" within licensee categories. These were checked against manual pretotals both in quantity and in total number of records to insure that all data were correct and properly recorded. In the case of nonquantitative descriptive data, such as names, addresses, etc., manual edits were performed by two-man teams, reading from output and source documents.

II. Metholological Description--1969 Fiscal Year Survey

The survey instrument design for the radio survey was the result of selecting elements and parts from materials which already existed. Additional inputs were decided upon as a result of interviews with key people throughout the broadcasting industry. These raw materials were then organized and expanded into a final document. The respondent selection was determined from existing address lists and included all known noncommercial radio operations. However, the universe of CPB-qualified public radio stations was ultimately decided upon as the base was complete. Questionnaires were mailed directly to the station managers or chief executive officers of the public radio stations. Return routing was to the project director.

Raw data from the questionnaires were manually edited and corrected for obvious errors such as misspelling and misplaced data. Adding-machine totals were made of financial data, including columnar totals, cross-footings, and balancing procedures. Missing data and significant errors were referred to station management by writing and by telephone. During the 1969 survey, these follow-up procedures involved practically all respondents. The preparation for data entry to the computer files was accomplished as a direct quantity transferral where possible and included the development of standard coding and numbering schemes, adequately documented to facilitate data processing. Most data were entered from the remote-access terminal. A limited amount was keypunched. Machine edit routines were programmed, and comparisons of key control totals for financial data and record counts were made and compared with manual control totals to insure file accuracy.

The experience in collecting and processing data from the 1969 fiscal year survey was of great value as a developmental process. In addition, it adequately served the original purpose of the Corporation for establishing such a system. It also achieved the following benefits:

1. It generated a response which provides for the future orderly flow of standardized information from the field.

2. It provided the best base of information thus far collected concerning the industry.

3. It destroyed many existing popular beliefs and generalizations and enlightened many concerning the size of the task ahead.

4. It provided a base from which to grow towards the goal of long-range funding for the industry.

5. It served as a valuable exercise for local station management,many of whom emerged more knowledgeable concerning their operations.

6. It resulted in the design of an improved survey instrument for succeeding years.

APPENDIX D

QUESTIONNAIRE ITEMS AND DEFINITIONS OF SELECTED TERMS

Data in this report derive from the following items which were included in the survey of CPB-qualified public radio stations, fiscal year ending June 30, 1970, conducted by the Corporation for Public Broadcasting.

Sources of income, revenues, and funds:	Total radio station operations

1. Amounts provided directly by agencies of the federal government (Do not include CPB)

Name of agency	Amount
_____	$ _____
_____	_____
_____	_____
_____	_____
_____	_____
Total Federal Government	$ _____

2. Amounts provided by public boradcasting agencies such as: CPB, NET, NITC, GPNITL, other noncommercial radio stations and television stations, and any other agency engaged principally in production or operations for noncommercial broadcasting.

Name of organization	Amount
Corporation for Public Broadcasting	$ _____
_____	_____
_____	_____
_____	_____
Total public broadcasting agencies	$ _____

3.	Local boards and departments of education	$ _____
4.	Other local government or agency sources	$ _____
5.	State boards and departments of education	$ _____
6.	Other State government or agency sources	$ _____

7. State colleges and universities $ _____

8. Other colleges and universities $ _____

9. Underwriting of specific programs $ _____

10. Foundations - National $ _____

11. Foundations - Other $ _____

12. Auctions - GROSS income $ _____
(Net income after expenses was: $_____)

13. "Profits" from subsidiary enterprises $ _____
(Please describe briefly_____)

14. Commercial stations and network contributions $ _____

15. Subscribers and individuals $ _____
(Please estimate the number of paying members:
- @ $50.00 or more #_____
- @ less than $50.00 #_____)

16. Business and other organizations not includable elsewhere $ _____

17. Other production contracts not includable elsewhere $ _____

18. Sub-channel (SCA) utilization $ _____

Other (Please specify):

19. _____ $ _____

20. _____ $ _____

21. _____

22. All other sources of funds $ _____

23. Total income, revenues, and funds
(Sum of lines 1 through 22 preceding) $ _____

How much of the total income on line 23 above would you estimate or attribute to instructional radio services? $ _____

	Total radio operations
Budgeted operating expenses: (Do not include capital equipment or depreciation)	
Technical	
Salaries and wages	$ _____
Other expenses	_____
Programming	
Salaries and wages	_____
Other expenses	_____
Local production	
Salaries and wages	_____
Other expenses	_____
Instructional and school services	
Salaries and wages	_____
Other expenses	_____
Development and fund raising	
Salaries and wages	_____
Other expenses	_____
Promotion	
Salaries and wages	_____
Other expenses	_____
Training and personnel development	
Salaries and wages	_____
Other expenses	_____
General and administrative	
Salaries and wages	_____
Other expenses	_____
All other operating expenses	
Salaries and wages	_____
Other expenses	_____
Total budgeted operating expenses (Sum of the above)	$ _____

		Amount
Costs absorbed by other institutions	Total	$ _____

	Total radio operations
1. Capital expenditures during the 1970 fiscal year:	
a. Land and land improvements	$ _____
b. Buildings	_____
c. Equipment - (Please itemize generally)	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
d. Vehicles	_____
e. Furniture and office equipment	_____
f. All other capital equipment	_____
2. Total capital expenditures during fiscal 1970 (Sum of items a through f above)	$ _____
3. Total capital expenditures to date (Sum of total original cost of facilities, equipment, etc., on hand as of 6/30/69, plus 2 above, plus value of gifts--excluding money--and donations of equipment, minus original cost of equipment sold, scrapped or disposed of during fiscal year 1970)	$ _____

Definitions of selected terms used in survey

Budgeted operating expenses - These are the actual costs of operations which were budgeted for, and under the management control of, your station. Do not include depreciation, capital expenditures, repayment of loans, invested money, allocation of money to reserve funds, or costs absorbed by other institutions.

Capital (expenditures) - This term can be variously interpreted but essentially it applies to expenditures for acquiring land, buildings, structures, machinery, equipment, facilities, hardware, automotive equipment, office equipment, and significant improvements to existing major items of property and equipment. Usually not included (but charged to operating expenses) are routine repairs and maintenance, items of inconsequential cost, rents, expendable supplies and materials, and items with a life expectancy of less than two or three years.

Income (revenues, funds) - All sources of money or appropriations of money received or entered in the books as receivable in the current reporting year. (This does not include monies withdrawn from reserve accounts which were established with income or funds received in prior years.)

Instructional radio services (income) - The question at the bottom of page which refers to this item seeks an estimate of the proportion of total income or appropriation which is received as a result of, or in support of, the instructional and classroom programming services of your station. The answer is more clear-cut in an example where amounts are calculated on average daily school attendance times an established rate per pupil. The amount for others such as school stations and networks not funded on this basis, for example, is not so readily derived.

Instructional and School services - Salaries and other costs associated with this activity not already included elsewhere.

Local production - Costs associated with the production of programs and programming materials at your local facilities.

"Profits" from subsidiary enterprises - does not refer to profit-making in the usual sense, in that all units of our industry are recognized as nonprofit or noncommercial and as such do not sell air time or distribute profits. The term "profit" refers to non-broadcasting ventures or enterprises (other than auctions, subscriptions, memberships, and donations) offering services or materials to raise money, the proceeds of which are used to support broadcasting activities.

Programming - All other costs of acquiring and scheduling programs.

Technical - Costs associated with repairs, maintenance, control, and technical operations not includable elsewhere.
